Skype For Business Mac 10.8.5

Perhaps someone here can assist? When she tries to install Skype for Business, it gives her three options: 1) Install for all users 2) Install only for me 3) Install on a specific disk.

- 1. skype business
- 2. skype business for mac
- 3. skype business online

The Skype for Business Web App plugin installer does not allow its software to be installed here.. Thank you in advance!. I know next to nothing about MAC stuff, but a client of mine has had this issue, which I have tried to Google Fu with no luck.

skype business
