In MS Word (2003), when I want to keep a line (that is formatted as a hyperlink+header) and subsequent lines (regular text) on the same page, the only way that works for me is to choose format/paragraph/keep with next.. Where can I read what are Microsoft's definitions for keep with next, keep lines together, and widow/orphan control?Notes: • suggest using styles, but I have quite a few different formatting for the first line (in different places of the document), which makes this suggestion impractical.

It's mostly used for a small repeating pattern image like this If the image is too small for the page, the image is repeated.. • seems to answer keep lines together, but it'd still be nice to see MS definition.. Be sure that the 'Widow/Orphan control' box is checked Setting up Word - Mac Setting up Word - PC 2.. How do i add a background picture or a watermark in powerpoint for mac What you see on the Word page is the top left corner of the image.. Magix movie edit pro manual Here are some steps for creating one: Center your title horizontally, and position it about one-third of the way down the title page.

widow orphan control word

widow orphan control word, widow orphan control word mac, widow orphan control word 2010, turn off widow orphan control word, what does widow orphan control mean in word, word widow/orphan control not working, word pagination widow orphan control, how to turn on widow orphan control in word 2016, remove widow/orphan control in word, widow orphan control tables word, define widow/orphan control in word, wordperfect widow orphan control

The image isn't resized at all There's no provision to resize or reposition the page background image within Word.

widow orphan control word 2010

Join the conversation now I imagine that using a RadFixedDocument could (hypothetically) allow me to control exactly where a paragraph or table breaks across a page, or gets pushed to a new page.. Forum thread about Widow/Orphan Control in RadFlowDocument in Telerik Document Processing.. Office 2011 for mac google drive The problem I have with using keep with next is that it's fine when the relevant lines are towards the end of the page, but if subsequent editing pushes them towards the middle or top of the page, they still end up in the next page, and I'm left with a large unnecessary white space.. Creating a title page Every document that uses APA style should have a separate title page.

what does widow orphan control mean in word

The option format/paragraph/keep lines together which seems the obvious choice, doesn't seem to work. e10c415e6f
